

# Personal Hygiene

# What Is Personal Hygiene?

Personal hygiene is how we look after our bodies. Keeping ourselves clean and tidy makes us feel better about ourselves and also keeps us, and those around us, healthier!

# What Does It Include?

Can you think what might be included in personal hygiene? Discuss:

Brushing our teeth and washing hands

Hygiene of private parts and menstrual care

Wearing clean clothes

Showering or bathing regularly

Keeping our noses clean

Minimising the spread of germs where we can

# Brushing Our Teeth

It is recommended that we brush our teeth twice a day, for around 2 minutes.

We should visit the dentist every 6 months for a check up.

Brushing properly removes plaque. Plaque can cause cavities, toothache, gum disease and even our teeth to fall out!

It also gives us lovely fresh breath!

# Washing Our Hands

Washing our hands is one of the simplest ways we can keep ourselves and those around us healthy.

Think about everything your hands touch in a day...

Computers screens and keyboards

Door handles and stair banisters

Toilet flushes

# Handwashing

When we touch things, we pick up germs, which we can then spread by rubbing our eyes, putting things into our mouths, etc.

We can even spread them to our friends and family without realising. Some germs can make us feel unwell, from a cold to a tummy bug and more.

Washing our hands with clean, warm water and soap will kill off the germs and keep our hands clean. During corona pandemic we learn the importance of hand hygiene.

# When Should We Wash Our Hands?

Can you think of times when its really important to wash your hands? Discuss!

When they are dirty!  
Before we eat or help prepare food  
After petting animals  
After using the toilet  
After we sneeze, cough or blow our noses  
Before **AND** after visiting someone who is unwell

# Don't Forget About Your Nails

When washing our hands, it is important to keep our nails clean. Underneath our fingernails is a great place for germs to hide!

It's best to keep your nails neatly trimmed and clean!

And try not to bite them.....

# Showering or Bathing Regularly

Years ago, it was difficult to keep your whole body clean. Water had to be heated by the fire, a bath tub was filled and the whole family used the same bath water. Remember, families were bigger back then, sometimes with 6 or more children! Can you imagine being last to use the bath water?

Luckily, it's very different nowadays! We have hot water straight out the shower or taps for the bath so there is no excuse not to shower regularly!

It is especially important to shower daily and after we exercise.

# Clean Clothes

It is really important to wear clean clothes. If we wore the same thing all the time, they would get dirty and start to smell.

We don't mean wear new, clean clothes every day, but if, for example, you wear the same trousers to school for a few days, make sure that you take them off as soon as you get home and let them air out for a while! Your cloths should be sundry to kill the harmful germs that are responsible for causing infections.

some of the basic toilet habits and tips to follow to improve toilet hygiene.-

- **Wash your hands every time you visit a washroom.**
  - **Always use tissues or paper towels to dry your hands.**
  - **Avoid the use of a hot air hand dryers in a washroom.**
  - **Carry a hand sanitizer everywhere you go.**
  - **Do not spend hours sitting on a toilet seat.**
- **Clean your wash rooms daily to reduce risk of urine infections.**
